ABSTRACT OF THE DISCLOSURE

The present invention relates to compounds represented by formula (I):

$$X = \begin{cases} 1 & \text{Olympic of } 1 \\ N & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N \end{cases}$$

$$X = \begin{cases} 1 & \text{N} = C - N$$

in which at least one of R³ and R⁴ is a group represented by formula (A):

$$\begin{array}{c} ---(C(R^L)_2)_{\overline{0}} - x - -(C(R^L)_2)_{\overline{p}} \\ \hline Q - Q \\ (R^6)_{1-4} \end{array}$$
 (A)

where the structural variables are defined herein. The compounds are useful for blocking sodium channels.
